

IR signal extender EXTEND IR

VIZ-ART
AUTOMATION

1. Principle of operation:

EXTEND IR transmits IR codes by wire inside furniture or above ceiling and transmits it wirelessly to AV equipment. Extend IR allows to control AV equipment (or other IR remote controlled equipment) installed in furniture/ceiling/etc. Useful for Home Cinema installation AV receivers/Blue Ray players as well as LCD/DLP projectors.

Sample in ceiling installation:

Sample in furniture installation:

2. Installation:

Connect device to the power supply 230 V. Mount IR receiver diode in comfort location for IR remote control. IR transmitter place near your IR sensors of controlled AV equipment.
