

## IR receiver + RS232

Self-learned IR receiver with RS-232 control option. Offered as control accessories for projector/plasma lifts and projection screens powered with 230V. Compatible with most of Central Control Systems and SMART Home Systems available.

## TRIGGER 5-30V DC

Ideal solution for control projector lift, projection screen etc. Controlled via TRIGGER signal (in range between 5-30V DC) from AV equipment. Wired control 1 unit. To control more use TR-2 module.

Installation diagram with TRIGGER 230V AC and EXTEND IR.

## EXTEND IR

IR signal extender, controls covered/installed/hidden in furniture AV equipment. Mostly used for projector lift operation when original remote control is required (standards RC5, RC6, NEC etc.).

## TR2

Module required for simultaneous control of projector lift and projection screen i.e. Trigger 5-30V, Trigger 230V or RF radio receiver. Properly connected TR-2, controls from 2 up to 16 units. Easy installation. Often used as an extension of existing AV Central Control Systems.

## TRIGGER 230V AC

Trigger 230V module controls wirelessly - max.8 RF radio receivers and wired 1 AV unit. TR-2 module compatible. Mostly used as an wireless extension of existing AV Central Control Systems. No extra cable installation needed.

Installation diagram with TRIGGER 230V AC and RF Receivers.

## VIZMOTE 1; VIZMOTE 5

VIZMOTE 1 & VIZMOTE 5 are 1 and 5 channel radio remote controls. Paired with RF Receiver, VIZMOTE 1 & VIZMOTE 5 remote control is dedicated for projection screens, projectors, shades/blinds etc. 1 VIZMOTE can control up to 8 RF receivers. VIZMOTE remote control can manage AV and home theater systems. Includes wall bracket for remote control.

## Built-in RF receiver

Together with Somfy remote control, used to control motorized projection screen. Somfy RF 1 and RF 5 remote control compatible. Operating range of the built-in RF receiver 30 meters from remote control.

## RF receiver

RF receiver controls AV equipment powered with 230V, home & office automation systems etc. Best for Central Control System extensions without any additional wiring. RADIO REMOTE TOUCH 1 remote control and Trigger 230V compatible.

## RF remote control

1-channel Somfy remote control for controlling 1 unit or 1 group of AV units. 5-channel version controls max. 5 units or groups of AV units (projection screens, motorized lifts, blinds, curtains etc.) Somfy RF receiver and built-in Somfy RF receiver compatible.

## RF receiver with buttons

RF receiver with control buttons. Mostly used to control projection screens and projector lifts in meeting rooms. Somfy RF 1 and RF 5 remote control compatible. Operating range: 30 meters from remote control.
