

V-LIFT

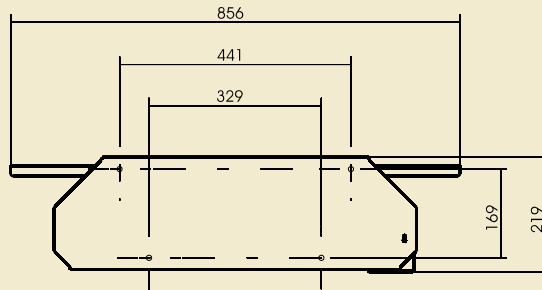

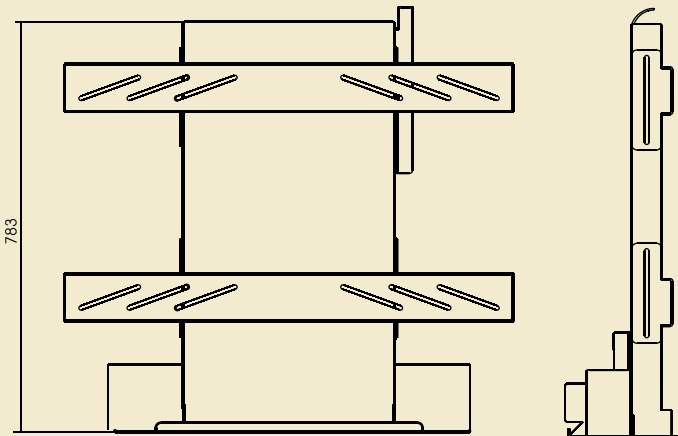

Advantages of the lift: smooth movement chosen by architects in arranged living spaces, in which the TV is to be visible only when needed (e.g. in EIB systems).

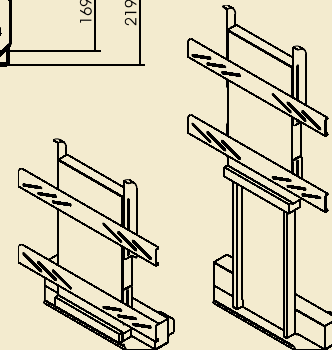

Functionality: large lifting capacity (to 70 kg); easy installation in a piece of furniture or floor; comfort of use; control options: IR, RF remote control, Trigger, RS232 port, LVC, SMART Box.

Vertical lift that slides the television set out from a piece of furniture or the ceiling, also recommended for intelligent home systems. Reliability, easy installation and control via RS232 make it attractive and comfortable to use.

Available models: • V-LIFT

Version 2.0

V-LIFT	
Max TV height [mm]	690
Capacity [kg]	70
