

SMART Box

NEW

- Contains:
- IR receiver
 - RS232
 - Low Voltage Control - TRIGGER 5-30V
 - Potential Free Control (Dry Contact Control)

The SMART Box controller is an intelligent multi-functional control module. By choosing SMART Box for Audio Video installation you can choose which of the above functions you will use. Using the SMART Box control module, you have several functions in one device to be ready for various solution concepts during installation.

Installation diagram with TRIGGER 230V AC and EXTEND IR.

EXTEND IR

IR signal extender, controls covered/installed/hidden in furniture AV equipment. Mostly used for projector lift operation when original remote control is required (standards RC5, RC6, NEC etc.).

TR2

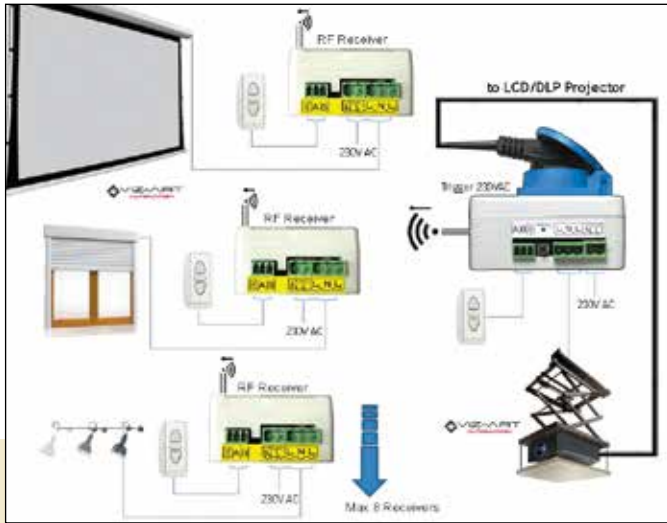

Module required for simultaneous control of projector lift and projection screen i.e. Trigger 5-30V, Trigger 230V or RF radio receiver. Properly connected TR-2, controls from 2 up to 16 units. Easy installation. Often used as an extension of existing AV Central Control Systems.

TRIGGER 230V AC

Trigger 230V module controls wirelessly - max.8 RF radio receivers and wired 1 AV unit. TR-2 module compatible. Mostly used as an wireless extension of existing AV Central Control Systems. No extra cable installation needed. LVC in standard.

Installation diagram with TRIGGER 230V AC and RF Receivers.

VIZMOTE 1; VIZMOTE 5

VIZMOTE 1 & VIZMOTE 5 are 1 and 5 channel radio remote controls. Paired with RF Receiver, VIZMOTE 1 & VIZMOTE 5 remote control is dedicated for projection screens, projectors, shades/blinds etc. 1 VIZMOTE can control up to 8 RF receivers. VIZMOTE remote control can manage AV and home theater systems. Includes wall bracket for remote control.

Built-in RF receiver

Together with Somfy remote control, used to control motorized projection screen. Somfy RF 1 and RF 5 remote control compatible. Operating range of the built-in RF receiver 30 meters from remote control.

RF receiver

RF receiver controls AV equipment powered with 230V, home & office automation systems etc. Best for Central Control System extensions without any additional wiring. RADIO REMOTE TOUCH 1 remote control and Trigger 230V compatible. LVC in standard.

RF remote control

1-channel Somfy remote control for controlling 1 unit or 1 group of AV units. 5-channel version controls max. 5 units or groups of AV units (projection screens, motorized lifts, blinds, curtains etc.) Somfy RF receiver and built-in Somfy RF receiver compatible.

RF receiver with buttons

RF receiver with control buttons. Mostly used to control projection screens and projector lifts in meeting rooms. Somfy RF 1 and RF 5 remote control compatible. Operating range: 30 meters from remote control.
